Polymeric has developed SmokeScreen+; an Anti-Graffiti/ Flame suppressing coating for a variety of materials and applications. The SmokeScreen+ coating has passed the rigorous testing requirements of the 701 Fire Test and the California Code Title 19, when printed on flame retardant materials. SmokeScreen+ Anti-Graffiti properties are unlike any product in the industry; with resistance solvents, paints, markers, cleaners, gas, sauces, mustard, red wine and acids. SmokeScreen+ cures extremely fast for in-line, high speed and cure, without blocking. SmokeScreen+ UV coating has excellent contact clarity and will not detract the visual aesthetics of the graphic it's coated on. It is ideal for use on Litho, Flexo, Screen and Digitally printed graphics, and wall-coverings.
