PolyMembrane PCM is a UV curable ink specifically formulated for multi-colored sub surface applications, such as, membrane switches, nameplates, counter mats, and instrument panel overlays. PCM has an excellent tolerance to pressure sensitive adhesives applied directly to the ink film. This ink has demonstrated remarkable flexibility for embossing, die-cutting and mechanical life cycling.

Performance Properties
- Excellent adhesion range on polycarbonate and polyester films
- Extremely flexible for multi-layer applications and embossing
- Meets GE’s test specifications for acceptance on GE Lexan® and Valox® PTX print treated films
- Suitable with high tack pressure sensitive adhesive application
- Mechanical life cycle actuation tested

Recommended Substrates
- Polycarbonate
- Most print treated polyester materials
- Polycarbonate / Polyester blends
- PVC
- Rigid Vinyl
- Tedlar®

Curing/Processing Guidelines
PCM was designed to cure in an oxygen environment and does not require nitrogen inserting for thorough cure. PCM will cure well when printed through 380-305 plain weave polyester mesh. PCM’s optimal cure window of 200mJ at 600 mW for clear and most colors and 300mJ at 600mW for opaque whites, black and greys, with one 200 watt per inch mercury vapor lamp. Special super opaque products like Backing White and Barrier Black are often printed through a 305 (120cm) plain weave mesh and may require at least 300 mJs for complete cure.

Adhesives
Lamination or mounting contact adhesives to printed parts should be done after a 24 hour “post cure” period. This period, between curing and adhesive lamination, provides the ink film and substrate time to stabilize, improving adhesion properties. Pressure sensitive adhesives are known to contain materials, which migrate through the under-cured ink films and weaken the bond between ink and substrate. A properly cured ink film will pass a crosshatch tape test (ASTM D3359-93). Please test each print layer in multiple places throughout the run.

Coverage
3,200 to 3,600 square feet per gallon based on ink deposit .40 - .60 mil dependent on color and printing conditions.

Printing
Mix well prior to use. While supplied in press ready condition, PCM Thinner for special viscosity adjustments. Care should be taken to print the ink at optimal temperature 70-90 degrees F. Cool ink will have heavier viscosity and will not flow properly, whereas hot ink will be lower in viscosity resulting in poor definition and decreased opacity.

Storage
Care should be taken to store ink in tightly closed containers located in a cool (60-80°F/15-27°C) dark place. After long production runs excess ink from the screen should be properly disposed. With suitable conditions, unopened ink is expected to have a shelf life of approximately twelve (12) months from date of manufacturer, six (6) months for white inks.

Metallic’s
Use the Metallic Mixing Clear to prepare metallic ink as its increased viscosity helps insure a good particle suspension.

Recommended mixing ratios, by weight are:
- 28% gold paste
- 12% silver paste

For optimum coverage and opacity, 280-305 (110 - 120cm) plain weave mesh is recommended. Use XR Overprint Clear for extended weatherability and to improve the non-tarnishing properties of the product.

Precautions
Read the safety data sheet prior to processing. It contains instructions for precautions to be taken when handling inks. If ink comes in contact with skin wipe off with a clean, dry cloth (do not use solvent). Wash and rinse the affected areas with soap and water.
Process Printing
For superior halftone reproduction, halftones are available in a range of density levels. Additional control of density may be achieved with use of XR HT Base. For best results, use 380 (150cm) or finer and a smooth, thin stencil coating should be utilized with process printing.

Color Availability
PolyMembrane PCM is available in opaque standard colors. Custom matches, metallic, fluorescent and transparent colors are obtainable upon request.

- PCM-101 Primrose Yellow
- PCM-111 Lemon Yellow
- PCM-123 Medium Yellow
- PCM-131 Brilliant Orange
- PCM-135 Vivid Orange
- PCM-141 Fire Red
- PCM-151 Scarlet Red
- PCM-155 Rubine Red
- PCM-160 Rhodamine Red
- PCM-180 Warm Red
- PCM-190 Process Blue
- PCM-200 Peacock Blue
- PCM-205 Reflex Blue
- PCM-210 Ultra Blue
- PCM-220 Emerald Green
- PCM-225 Forest Green
- PCM-226 Lime Green
- PCM-235 Teal
- PCM-240 Purple
- PCM-260 Brown
- PCM-301 Opaque Black
- PCM-311 Opaque White
- PCM-312 Jet Black
- PCM-026 Brilliant White
- PCM Mixing/Overprint Clear

PolyMembrane PCM  is available in opaque standard colors. Custom matches, metallic, fluorescent and transparent colors are obtainable upon request.

Pantone Matching System® Colors
The nine PANTONE® approved Color Matching System (CMS) shades are used to simulate the PANTONE® Color Specifier colors. Formulas were designed for maximum opacity and are available in book or Imaging Color source Software formats.

- PCM-064 CMS GS Yellow
- PCM-066 CMS RS Yellow
- PCM-114 CMS Orange
- PCM-121 CMS YS Red
- PCM-164 CMS BS Red
- PCM-165 CMS Magenta
- PCM-127 CMS Violet
- PCM-230 CMS Blue
- PCM-325 CMS Green
- PCM-026 Brilliant White
- PCM-311 Opaque White
- PCM Mixing/Overprint Clear

We strongly recommend testing complete construction as per shop conditions prior to full production. MIX WELL BEFORE USE. Follow the directions on the package, ask for the safety data sheets and always follow the directions contained therein.

Important – Only the correct use of the product will allow satisfactory results. For this reason, closely related to the product supplied, Polymeric must decline all direct and indirect responsibility for the proper or improper use of the product. Make certain that product is right for the desired use, work according to the instructions given in our technical data sheets. Before use contact our Technical Service in case of doubt.

A. Warranty Liability Limited to Purchase and Installation Costs
Notwithstanding anything provided herein or any other written material to the contrary, Polymeric only warrants the purchase price and costs of installation. POLYMERIC SHALL HAVE NO LIABILITY OR OBLIGATION TO ANY USER, BUYER, PURCHASER, DISTRIBUTOR OR OTHER PERSON OR ENTITY FOR ANY SPECIAL, DIRECT, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, HOWEVER CAUSED, INCLUDING WITHOUT LIMITATION, PERSONAL INJURY, LOSS OF BUSINESS, LOSS OF PROFIT, OR OTHER DAMAGE, whether or not buyer shall have informed Polymeric of the possibility or likelihood of any such damages.

B. Limitation of Implied Warranty and Fitness for a Particular Purpose
POLYMERICS WARRANTY IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO AN IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE, AN IMPLIED WARRANTY OF MERCHANTABILITY, AND ANY OTHER IMPLIED WARRANTY ARISING OUT OF A COURSE OF DEALING, PERFORMANCE, CUSTOMER USAGE OR TRADE.
