Re: Polymeric U.S., Inc. (the "Company") - Essential Business Qualification

To Whom It May Concern,

As an initial matter, the Company wants to make it very clear that it supports all local, state and federal governmental efforts to limit the spread of COVID-19.

The health and safety of our employees, customers, partners and communities remain our number one priority and we are working hard to make sure that we minimize risks related to the spread of COVID-19. To that end, the Company has instructed all employees to implement social distancing and good hygiene and handwashing practices. The Company is also working to transition and facilitate employees working from home when possible.

The Company is an ink and coatings manufacturer and industrial print supplier. Our customers include digital OEMs, printer and printhead manufacturers, and printers. These customers are ultimately producing, among other things, labels for various medical products used in hospitals and packaging for food. Additionally, in light of the great need across the country, the Company is immediately starting to manufacture hand sanitizer.

In light of these activities, the Company firmly believes that it is an "essential business" (as that term and similar terms have been defined in various applicable local, state and federal orders relating to shelter in place for their citizens). As a result, the Company will continue its manufacturing operations, all the while taking the utmost precautions to safeguard against the spread of COVID-19.

If you have any questions regarding this letter, then please do not hesitate to contact me.

Sincerely,

Tim Leclercq

Chief Executive Officer

Polymeric U.S., Inc.
