Regarding: CONEG (CSG) Compliance

Many states have authorized hazardous packaging regulations that prohibit the addition of, and limit the presence of, lead, mercury, cadmium and hexavalent chromium found in packaging components. Packaging components have been defined as any individual assembled part of a package, including inks and labels.

Polymeric US warrants, based on information given to us by our raw material suppliers that our products conform to the Coalition of Northeastern Governor's (CONEG) toxic reduction requirements, which set the standard for state regulations. This includes all Standard Ink Systems supplied by Polymeric US as listed below:

Imagemark XR	Ultrabond WR	Thermoform TF
Renegade GP	Decoprint SS	Heatfold HF
Lazer LXII	Diamond-Kote Coatings	PCM
Smokescreen Coatings	Duraflex DF	GBS Gloss Bottle
Lightspeed	Checkmate II	Checkmate K
DualCure DC	GTR Graphic Transfer	LTD Long-Term Decal
Shurfire	Universal	Universal Plus
DTG	Election Series	F-Vac
K2	Mosaic	LE
Prestige	Hyflex	Shurfoot
Static King	VWrap	Solarshield

The CONEG legislation states that no product shall be offered for sale or for promotional purposes in a package that contains levels of the heavy metals in excess of 100 parts per million (0.01%), effective January 1, 1994.

Polymeric US maintains strict standards to produce an environmentally safe product. We will not intentionally add any heavy metals into our ink or additive formulations, except when specifically requested by the customer for a special application.

All standard ink products meet the ASTM Standard F 963.95 (the Fisher Price Standard) the European Standard EN-71 and 16CFR1303 requirements. All referenced Standards regulate the heavy metals content for coatings. Heavy metals included are lead, cadmium, mercury and hexavalent chromium.

If written certification is required, inks will be sent to an independent testing facility. The customer is responsible for the cost of certification testing.

For further regulatory information, please reference the SDS sheet available at polymericgroup.com or contact the Regulatory Compliance Department at 816-221-5567 or via email at regulatory@polymericgroup.com
